

May be used in Wine or Water.
THESE celebrated bitters are composed of purely of vegetables of the most innocent yet specific virtues. They are recommended particularly for restoring weak constitutions, cleansing the stomach and increasing the appetite—also a preventive against the cholera morbus, fever, and ague, removing nausea, vomiting, heart burning, weakness in the breast, pain in the stomach and other symptoms of flatulence and indigestion. One box will tincture one gallon. Price 25 cents a box.

Russell's Itch Ointment.
This choice and safe ointment is said to be superior to any now in use, for that disagreeable and loathsome disease, the ITCH. This ointment is so certain in its operation that no person troubled with the above disorder ought not to be without it. It is a remedy for cutaneous eruptions, eczema, affections of the head, or any other breaking out which arises from sharp humors in the blood. Price 25 cents a box.

Russell's Vegetable Billious PILLS,
OR FAMILY PHYSIC.
FOR general use in cases of Jaundice, morbid sensibility of the stomach and bowels, loss of appetite, flatulency, costiveness, Piles, and all diseases arising from bilious derangement—calculated for correcting the state of the blood, and cleansing the system of oil and viscid humors. These pills are a mild cathartic, producing neither pain nor griping, and are therefore a valuable and highly approved medicine, and are pronounced as such by the most distinguished physicians.—Each box containing 30 Pills. Price 25 cents a box.

Russell's Celebrated Salt Rheum Ointment.
THIS is unquestionably the best and safest remedy ever offered to the public for that obstinate disorder, SALT RHEUM. Where other means have failed, it has succeeded, and the fact that it has been extensively used by eminent Practitioners speaks volumes in its praise. It is equally efficacious in all diseases of the skin, ring worms, and the most inveterate Itch, &c. &c. Numerous certificates might be obtained, but the proprietor chooses that a fair trial should be the only evidence of its superior efficacy. Price 50 cents a box.

A fresh supply is just received and for sale by J. & J. H. PECK & Co., Dr. Moody, Lathrop & Potwin, Burlington—S. H. Barnes, Charlotte—M. Hall, Hinesburgh—O. Strong, G. & W. L. Parker, Huntington—J. & W. Vergennes—S. H. & L. L. Lathrop, Green—J. H. Hamilton, P. J. Fletcher, Jr.—D. B. Wilson, S. B. J. Fletcher, Essex—D. W. Carpenter, Waterbury and with the Druggists generally throughout the United States, and at wholesale by Wm. C. Thompson & Co., Boston.

Compound Syrup ICELAND MOSS.

For the cure of Colds, Asthma, Whooping Cough, Spitting of Blood and Consumption.

ICELAND MOSS grows plentifully in the Island of Iceland, from whence it takes its name, and in all the high northern latitudes of Europe and Asia, where its medicinal qualities have been long known, and highly appreciated. This plant contains a larger proportion of *Vegetable Mucilage* than any other known substance, and in combination with it is a bitter principle which acts most beneficially in giving strength in cases of great weakness and debility of the lungs. The knowledge of many of our most valuable medicines, for the cure of diseases, have been obtained from observing their effect on brute animals—so in the case of this most invaluable Moss, its virtues were first discovered by their effects on the *hurd, haddock*, and *sagefish*. Rain Deer, which derives its principal nourishment from the *Iceland Moss*, and whose milk becomes so highly imbued with its balsamic virtues, that it is used with the greatest confidence as a sovereign remedy for the inhabitants of all those countries for the cure of all diseases of the breast and lungs. In France, this compound has long been known, and extensively used; and to its salutary effects as much as to the salubrity of the climate, is probably owing the very small number of fatal cases of consumption in that country, compared with Great Britain and the United States. This Syrup contains all the medicinal virtues of the Moss in the most concentrated form, and is prepared from the original receipt from Paris, only by.

Wanted,
500 Yds. Sheep Gray Cloth—200 lbs. woolen Knitting Yarn, and 1000 pairs Woolen Socks in exchange for goods.
Sept. 29. LYMAN & COLE.

IMPROVED ROTARY STOVE.

THE Subscriber would just say to the public, that he has received a large quantity of the *Improved Rotary Stove*, of different sizes and will keep them constantly on hand at his Store, North side of Court House Square.

Also, Parlor, Box and other cook Stoves, of different Patterns.

Also, several hand Stoves to sell or Rent, cheap—also Pipe, stove trimmings, &c. I would here remark that in consequence of the rapid sales that attended the *Improved Rotary Stove* the last season, it was impossible to manufacture them as fast as they were ordered; but the public may be under no apprehension on that point this season, as I have over four times the amount now manufactured, that I had last season at this time, so that people from a distance may come without fear of disappointment. I here omit a long list of Recommendations, believing that the *Improved Rotary Stove* has been sufficiently tested, to recommend itself in this vicinity.

The improvements that we have made upon the *Stove* for the last season are valuable; we now make the fire Plate nearly three times the weight of those last year and turn the friction Rollers on which the cap rests, and various other improvements not necessary to mention.

The *Stoves* are Cast at the foundry of John D. Ward, and from the best Scotch and Moulton Pig, and are not surpassed, if equalled, for smoothness and beauty of finish, in this section of the country.

N. B. I have recently seen a few *Stoves* in this vicinity called *Improved Rotary Stoves*, that have no friction rollers under the cap, but turn upon a pivot in the same manner that I first shaped mine; but after using mine in that shape one year, I found that it did not answer my expectations. I discovered that heating the *Stove* caused it to turn very hard, especially when the *Stove* was loaded—when there was a kettle or boiler of water upon the top it was almost impossible to turn it without spilling the water. I did not at first understand the reason, as it would turn easy when cold, but finally ascertained that by heating the *Stove* it softened the iron, and as the boiler would rest upon one side, it caused so much friction that it was impossible to use them with safety or convenience, and in order to get rid of this friction I have placed under the outer edge of the cap friction rollers, and have them turned so as to be perfectly true and smooth. The few *Stoves* above referred to are not made at Ward's Foundry, neither are they made from pig or remelted iron, but from the raw ore, and the plates consequently are more porous and stuggy; and the back fire plate is not more than half the thickness of mine. Any person can very easily tell my *Stove*, or those made at Ward's, by the friction rollers, as we make no others.

WM. BLAKE.

Burlington, Oct. 1, 1836.

Fall Goods.

THE subscribers are now opening an extensive assortment of Goods adapted to the fall trade which will be sold cheap for Cash.

GUY CATLIN.
Burlington, Vt. 9th Sept. 1836.

New Goods—Sept. 8.

COMPOUND Chlorine Tooth Wash. The discovery of the chloride of Soda & its uses by Labarraque of Paris, was an addition to the resources of medicine of the utmost importance as a neutralizing agent. To counteract at once the principle of decay, which commencing imperceptibly, slowly gathers strength, and finally destroys, is the important service which can be derived from the use of chloride of soda, when administered with skill and care; the diseases of the teeth being, in the great majority of cases, the result of neglect, and a gradual accumulation of the principle above alluded to, it became obvious from the earliest experiment, that the chloride was the proper remedy, and preferable to powder, dentifrice, &c. of whatever kind or pretension. By a chemical analysis it will be found that the greater part of the chloride compounds so extensively in use, do not contain a particle of the chloride of soda, on the agency of which their efficacy must necessarily depend. The article here advertised is confidently offered to the examination of the public, as possessing in an eminent degree, the virtue of neutralizing all that is offensive in the mouth and breath, removing soreness and sponginess of the gums, destroying the taint of tobacco, or any other effluvia from whatever cause.—In short, this preparation will be found to justify the various commendatory notices and recommendations it has received, wherever it has been introduced. Just received and for sale at the Variety Shop.
PANGBORN & BRINSMID.

TIN WARE,

which they will dispose of at wholesale or retail, as low as can be purchased in this section of the country. They have also on hand and will shortly receive Improved Rotary and other Cooking and Box

STOVES,

of various sizes and most approved patterns. Stove Furniture and Pipe of all descriptions—all of which will be sold on the most reasonable terms. All orders in their line will be promptly attended to.
J. H. STARR.
H. B. BOSTWICK.
Burlington, Sept. 1, 1836.

Utility.

THE public are hereby informed that the subscriber has invented certain new and useful machinery for manufacturing starch from potatoes, and has applied for a patent to secure his right to the same; and that he is making said machinery at his shop in Jerico, in the state of Vermont. The object of said machinery is more effectually to separate the small stones and gravel from the potatoes in the process of washing—and in the process of grinding, to reduce the potatoes to a more perfect pulp, by which a larger quantity of starch will be obtained than by the usual method. Starch manufacturers are invited to call and see.
SYLVANUS RICHARDSON.
Jerico, June 30, 1836.

Valuable Salve.

FOR Wounds, Bruises, or Sores of any kind, even those which have long been troublesome; an immediate cure for Burns of Scalds, Salt Rheum, Chapped Hands, and the best thing that I have ever known used for Sore Eyes. It is also good for the St. Anthony's Fire or Ictericum. I had a child very much afflicted with it; I applied many things, but to no effect until I made use of my Salve, which cured her in one day by rubbing it on the parts affected. In fact it may be used for every thing of a sore nature to good effect and with perfect safety, and no family ought to be without it. It would be found very useful on board of Steam Boats, or vessels of any kind, where accidents may happen; especially such as Scalds or Burns, for where applied, draws out the pain immediately and heal the wound quicker than any thing else I ever knew used. In case of sickness, where persons are under the necessity to have blisters drawn, this Salve is the best application which can be made after the flies are removed. If you wish to have it draw immoderately the plaster thick; if to heal immediately, spread it very thin on linen; you need no other application. Prepared and sold by A. RUTHERFORD, Burlington, Vt. Price 12 1/2 cents per cake.

This may certify to all that it may concern, that I have for more than two years past, made use of A. Rutherford's best all Salve, in my family, and I consider it preferable to any salve I have ever known manufactured; its utility will apply to fresh wounds, old sores, sore eyes, scalds and burns. ELWOOD LAMSON.
I do hereby certify that I have made use of A. Rutherford's Salve for nearly two years, and I never found any thing ever equalled it for a burn or scald, or a fresh wound; and for sore eyes there is nothing that ever I tried which will restore the eyes to their natural state in so short a time as this Salve. I do therefore recommend it for the benefit of mankind.
Burlington, May, 1836.
The subscriber hereby certifies that for more than a year past, in cases of wounds and bruises, he has frequently made use of and experienced the salutary effects of A. Rutherford's salve, and has also witnessed the same in others, and most cheerfully recommends it as a valuable salve.
E. W. SEAR.
Shelburn, May, 1836.

We the undersigned have used A. Rutherford's salve for more than a year, and have known others to use it, and can recommend it to be the best thing we ever knew for burns, scalds, fresh wounds, bruises, or old sores of any kind; and we further recommend it to be superior to any thing else, for sore eyes; and we do think A. Rutherford's salve ought to be more publicly known for the benefit of mankind at large.
NATHANIEL HOWARD,
F. W. GRAYWOLD,
LEONARD HENDRICK,
Vergennes, May, 1836. 6th June

Wood-Choppers Wanted.

THE subscribers wish to employ twenty or thirty men to chop Cord Wood.
JAMES SMITH & CO.
Aug. 13, 1836.

Ladies' Shoe Store.

THE subscriber has just opened, next door east of Smith & Harrington's Book Store in College-street, a Shoe Store, principally composed of Ladies', Misses' and Children's Shoes of all kinds and sizes. His arrangements (recently made with an extensive house in New York) are such as will enable him to sell at prices which he confidently believes will be satisfactory to all who may be disposed to extend to him their patronage.
D. A. BRAMAN.
Burlington, July 20, 1836.

Wool & Butter.

THE subscribers will pay Cash for Good Clean Fleeced Wool, delivered at their Store in Church Street.—They will also pay Cash for Good Butter at one shilling pr. pound.

The established reputation of this Company for stability, fairness and liberality in their dealings needs no further commendation.
Wm. A. GRISWOLD.
Burlington, April 6, 1836.

New Goods—Sept. 16,

VEGETABLE ROUGE, an exquisite article for enriching the glow of the cheek; this beautiful cosmetic preparation has at all times found a place at the fashionable toilet. It is an innocent, yet powerful auxiliary where circumstances have rendered assistance expedient, it is free from any noxious ingredient and entirely innocent; calculated to create new beauties where beauties were before; to add freshness to the cheek which care or illness may have rendered languid; and in place of the Lily to plant the Rose; just received at the Variety Shop.

PANGBORN & BRINSMID.

WEST'S PATENT CHLORINE COSMETIC and PILLS,

FOR Ringworms, Salt Rheum, Scald-head, and all Cutaneous Eruptions. This article is not thrown into market like most patent medicines, backed by some half dozen fictitious certificates; but it comes respectfully and honestly recommended, and is, we verily believe, all that it claims to be; and as such, it is offered to the public, by J. & J. H. PECK & Co.
Sept. 1836. Agents for the Patent

Harvard University.

THE Medical Lectures in Harvard University will begin at the Massachusetts Medical College in Mason street, Boston, the first Wednesday in November next, at 14 before 9 A. M. and will continue three months. For one month after the end of the course, lectures will be delivered in the College, and the Dissecting Room will be open to such students as may remain, without additional fee. Such students may also attend the Practice of the Massachusetts General Hospital.

Anatomy and Operations in Surgery. . . . Dr. Warren.
Chemistry. . . . Dr. Whewell.
Materia Medica. . . . Dr. Bigelow.
Medicine and Medical Jurisprudence. . . . Dr. Channing.
Principles of Surgery and Clinical Surgery. . . . Dr. Hayward.
Theory and Practice of Physic. Dr. Ware.

Clinical Lectures will be delivered as usual on the cases in the Massachusetts General Hospital.

NEW DISSECTING ROOM.

A new Dissecting Room is now building, and will be finished before the Lectures begin. It will occupy all the vacant land east of the Medical College. Every care is taken to make this important part of the medical school, as perfect as possible, so that it may furnish to the student ample facilities for prosecuting his Anatomical studies. The legal enactments of the state, on liberally and so wisely framed, will be faithfully and thoroughly applied to the accomplishment of their important objects.

WALTER CHANNING, Dean.
Boston, July, 1836.

Medcall's Patent Compound Oil for Painting.

A perfect substitute for Linseed Oil for all kinds of Painting, is offered to the public by the subscribers with the fullest assurance of its utility. It is now about eight years since it was brought to its present state of perfection, and during that has been extensively used & tested in every way which Linseed Oil is used for painting, for inside and outside house painting, on brick and on wood, and for coaches, signs, boats &c. As for spreading and drying for inside work it is not surpassed, and for body, and durability in situations exposed to the sun and weather, it is warranted far superior to the best Linseed Oil and being light colored renders it preferable for white and all other delicate colors.

One of the first painting establishments in this city [of more than twenty years standing] say in their certificate as having used Medcall's Patent Paint Oil do certify that more surface and better painting can be done per gallon than when mixed with pure Linseed Oil. This oil forms a combining substance when mixed with pure Leads that does not decompose and rub off by exposure to the sun, and by experience of two years, we are warranted in saying that painting done with this oil, will stand the weather much longer, and remain unpainted, when painting done in the usual way will not, and few oil cloths, we think it unnecessary every thing that we ever used." John N. Fassett has purchased the right to make and vend the "Patent Compound Oil" in the following States, viz: Pennsylvania, New York, Massachusetts, Vermont, Connecticut, New Jersey, South Carolina, Ohio, Michigan, Illinois and Indiana, and cautions all persons, against any infringement, as every offence will be met with rigorous prosecution.

The price of the "Patent Oil" will be one quarter less than Linseed Oil. It is warranted and sold wholesale and retail by
FASSETT, SELDEN & Co.
Dealers in Paints, Oils, Varnish, &c. 201 River street Troy N.Y.
August 5, 1836.

New Fall Goods.

ELEGANT gilt and plated metal scabbards Sabres; crooked and straight, fine and common Swords,
